### Type 1 Diabetes Therapy Submits Application to Start Clinical Trial Funding provided by stem cell agency

July 17, 2014

San Francisco, CA - A promising treatment for type 1 diabetes that has received almost \$40 million in funding from the stem cell agency, the California Institute for Regenerative Medicine (CIRM), has taken a major step towards being tested in people.

## Location, Location, Location

Making stem cells feel like they belong

An adage in real estate says that the most important thing is neighborhood, neighborhood, neighborhood. Researchers are learning that the same may be true for stem cell therapies. If you want to mature stem cells into the right adult tissue and get them to behave the way you want, you better pay attention to the environment where they are grown in the lab-before they are transplanted into people.

## Duke Launches Controversial Trial for Autism

Can stem cells be used to treat autism?

At this point the jury remains out on that question, but a growing number of kids are nonetheless getting such "treatments" at for-profit dubious clinics. Academic clinical researchers are interested in this area as well.
