World-First Embryonic Stem Cell Trial for the Heart

The first embryonic stem (ES) cell trial for severe heart failure is launching now in Paris. The long-awaited trial comes after much preclinical cell work on more than 350 rats, 50 immunodeficient mice, and 32 non-human primates. [Read more here.](#)

Parkinson's Disease Breakthrough: Stem Cells May Replace Damaged Nerves, Reverse Symptoms

Parkinson's disease patients can find hope in a new treatment, thanks to breakthrough stem cell research that successfully replaces damaged nerves. Swedish researchers have figured out how to create motor neurons that become lost in the brains of Parkinson's disease patients. [Read article here.](#)

ViaCyte's VC-01™ Investigational Stem Cell-Derived Islet Replacement Therapy Successfully Implanted into First Patient

ViaCyte, Inc., a privately-held regenerative medicine company, announced today that the first patient in its Phase 1/2 study was successfully implanted with VC-01™, its embryonic stem cell-derived islet replacement product candidate being developed as a treatment for type 1 diabetes. [Read article here.](#)
